SOFTWARE DEVELOPER

Experienced in Ruby on Rails and JavaScript based programming and a background in building and fixing PC and phones. Possess strong skills in critical thinking, self teaching, and interpersonal relationships that help companies mold me to become a leader in any environment. Has an obsession with self-improvement and will continuously strive to achieve their goals.

TECHNICAL SKILLS

Javascript, React, Node JS, Express, Socket IO, Ruby, Rails, HTML5, CSS, C++, Java, Python

TECHNICAL PROJECTS

Good Samaritan - Demo Github
A real-time Q/A application where travelers are able to ask any question around the world, and only nearby local users are only able to answer their question
- Used ZipcodeAPI to curate a list of local questions just from a user's zip code
- Implemented a React frontend, and a Node JS backend (Express, Socket.Io) to create a real-time messaging system

Mars Weather App - Github
A weather app where users are able to view the weather on Mars and Earth and see a comparison side-by-side
- Utilized NASA API and OpenWeatherMap API to display the weather on Mars and Earth
- Collaborated with another developer to build out the React frontend
- Built and managed data from a Rails backend to collect and show user and weather information

Curated - Github
A social media website where users are able to showcase their creative works
- Made with a Javascript frontend and Rails backend
- Managed the Rails backend database to bring crucial info to the webpage
- Built a bcrypt authentication for the backend to handle User login and signup information
